

High Performance ‘Green Building:’ Affordable Housing for the Future

Mission of Conference: Begin with a broad overview attractive to policy makers and higher level staffs, and conclude with technical training for housing practitioners. Presentation of topics related to green, energy efficient housing – how to design them, build them, equip them, inspect them, finance them and how cities are promoting them!

Who Should Attend: Leaders and staff at HUD, housing authorities, community development divisions, non-profit housing corporations, financial institutions, code enforcement committees, home appraisers units, city council members, and everyone interested in promoting affordable “green” buildings.
